

LS Central

Scan products on your mobile, pay, and leave

ScanPayGo

The customer app that unites self-scanning, loyalty, and self-checkout.

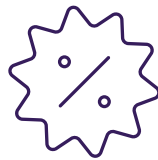

Self-scan items and pay on the app or at a POS

Maintain and share shopping lists

Collect and spend loyalty points

See store offers and promotions

All in just one powerful app

Benefits for shoppers

Shop fast and contactless. Scan products on your mobile device as you add them to your cart. Pay on the app or at a self-checkout, and off you go.

Maintain shopping lists. Save shopping lists and share them with friends and family. Items are checked off the list as you scan them and add them to the basket.

See your shopping history. Look up what you bought last month and copy items from previous shopping trips to a new shopping list.

Pay securely as you prefer. Pay on the app, and use loyalty points if you want. Or scan the QR code on the app and pay at the traditional register or self-checkout.

Collect loyalty points. Collect and spend points, check your loyalty status, and see and apply personalized offers and promotions.

Benefits for retailers

Stand out from the competition. Use ScanPayGo to run an unmanned, automated store, or simply to offer more convenience to your customers by letting them shop independently.

Add your branding and functionality. ScanPayGo is a white label app, so you can personalize it with your logo and colors. And if you need more functionality, you can add your extension and modify the code.

Get valuable data and improve your offering. Discover which items are often bought together or what offers are redeemed most often.

Offer the shopping, payment and checkout options you want. Should shoppers use ScanPayGo on their own mobile devices or on retailer's owned devices? Should they pay on the app, or use self-checkout terminals? You choose.

Ready to use, out of the box. ScanPayGo is developed to work with LS Central – no extra development needed from you.
