

Unified retail software for pet stores

Make your job easier with one
platform for all your requirements.

**Manage quickly and conveniently items, services,
events, bookings, and customers with a unified
commerce software solution.**

Unify your operations

Align all business
processes and keep
key information in your
enterprise within one
platform.

Unify your channels

Manage items, prices,
campaigns, offers,
customer loyalty and
more, in-person and
online.

Unify your viewpoint

Achieve a single
version of the truth
of your business and
customers. Have all data
in one place, and access
it from anywhere.

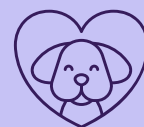

Ideal for:

Pet stores with
services like
grooming or kennels

Businesses selling
in store and online

National and
international chains

Tailored for pet supplies and animal food retailers

- Sell products and book services, from grooming and training to doggy day care, online and in store.
- Special order pet supplies you don't stock in store, and offer home delivery or pick up to any store location.
- Keep track of customer preferences, information on their pets, and past purchases for all your stores, including the eCommerce.

Offer the best pet shop experience online and in store

- Give helpful information on products, order items, and close sales anywhere in your store with mobile POS.
- Give customers the flexibility to purchase online and pick up, return, or exchange items in any store location.
- Reward your best customers with personalized promotions and offers on products and pet services, or with exclusive sales.
- Give customers personalized upselling and cross-selling suggestions online and in person with the help of AI.

Easily manage a complex mix

- Know in real time the exact quantities of each product you have and where it's currently located.
- Give customers real-time information on stock availability online.
- Keep optimal stock levels in every store with automated replenishment and distribution.
- Let the system help you forecast demand based on historical sales and trend projections.

Set yourself up for success

- Expand your pet stores chain and add services, products, and locations easily.
- Manage sales, customers, appointments, items, offers for your entire chain, centrally within one database.
- Expand and conquer new markets – the system supports country-specific regulations such as localizations and fiscalizations.

Free your staff to do what they do best

- Manage inventory tasks fast and effectively on handheld devices.
- Train employees quickly on just one system which they can use for sales, bookings, and appointments.
- Access your business data from any device, in the store or remotely, and react quickly.
- Reward your salespeople, trainers, or groomers accurately and on time with easy tracking of commissions.
